Anatomy and Physiology of Pelvis

- Overview of PPH
- Anatomy of Pelvic Circulation
- Physiology of Misoprostol (Oral and Rectal)
- Fourth stage of Labour

Pharmaceutical Products to control PPH

- Oxytocin
- Recombinant Factor VII
- Prostaglandins
- Carbetocin

PPH Treatment by Conventional Methods

- Gauze Packing
- Balloon Tamponade
- Anti Shock Garments
- Uterine Artery clamping through Vagina

Surgical Management of PPH : Innovative Techniques by Indian Innovators

- Suction Cannula
- Common Iliac Artery Clamp
- COMOC-MG Technique

Internal Iliac Artery Ligation Routes

- Posterior Approach
- Anterior Approach
- Extra Peritoneal Approach
- Uterine Artery Embolization

Blood and Blood Products in Obstetrics

- Massive Transfusion Protocol
- Monitoring of Blood Parameters
- Blood factors : Which, When and Why

Panel Discussion

- Traumatic PPH
- PPH - Anticipation
